DETAILED ACTION

Abstract

2. The abstract of the disclosure is objected to because it does not commence on a separate sheet see § 608.01(b).

Claim Objections

3. **Claim 28** objected to because of the following informalities: in line 14 n_{bin} is not defined in claim. Appropriate correction is required.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 18-34 are rejected under 35 U.S.C. 101 because the claimed invention as a whole must accomplish a practical application. That is it must produce a "useful, concrete and tangible result." State Street, 149 F.3d at 1373, 47 USPQ2d at 1601-02. The purpose of this requirement is to limit patent protection to inventions that possess a certain level of "real world" value, as opposed to subject matter that represents nothing more than an idea or concept, or is simply a starting point for future investigation or research (Brenner v. Manson, 383 U.S. 519, 528-36, 148 USPQ 689, 693-96); In re Ziegler, 992, F.2d 1197, 1200-03, 26 USPQ2d 1600, 1603-06 (Fed. Cir. 1993)). Accordingly, a complete claim should contain some indication of the practical application for the claimed invention. Claims 18, 29 and 34 only require "determining the hysteresis of the process device as a distance between the first and the second

characteristic curve at least at one point” and does not produce useful, concrete and tangible results. For example, the results were not stored, displayed or communicated to the user.

Furthermore, a process that consists solely of the manipulation of an abstract idea is not concrete or tangible. See *In re Warmerdam*, 33 F.3d 1354, 1360, 31 USPQ2d 1754, 1759 (Fed. Cir. 1994). See also *Schrader*, 22 F.3d at 295, 30 USPQ2d at 1459.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20, recites line 4, “if the calculated change is smaller”. It is not clear from the claim smaller than what value the calculated change is. Therefore, claim 20 is considered indefinite.

Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 24, recites line 3, “the interval being preferably in the order of one or more seconds”. “one or more seconds” does not clearly define the intervals because the interval can be one second or any other interval of time in the broad sense.

Claim 24, recites line 5, "collection period, preferably in the order of one or more minutes". "one or more minutes" does not clearly define the interval because the interval can be one minute or any other interval of time in the broad sense. Therefore claim 24 is considered indefinite.
